18. Appendix: quick reference

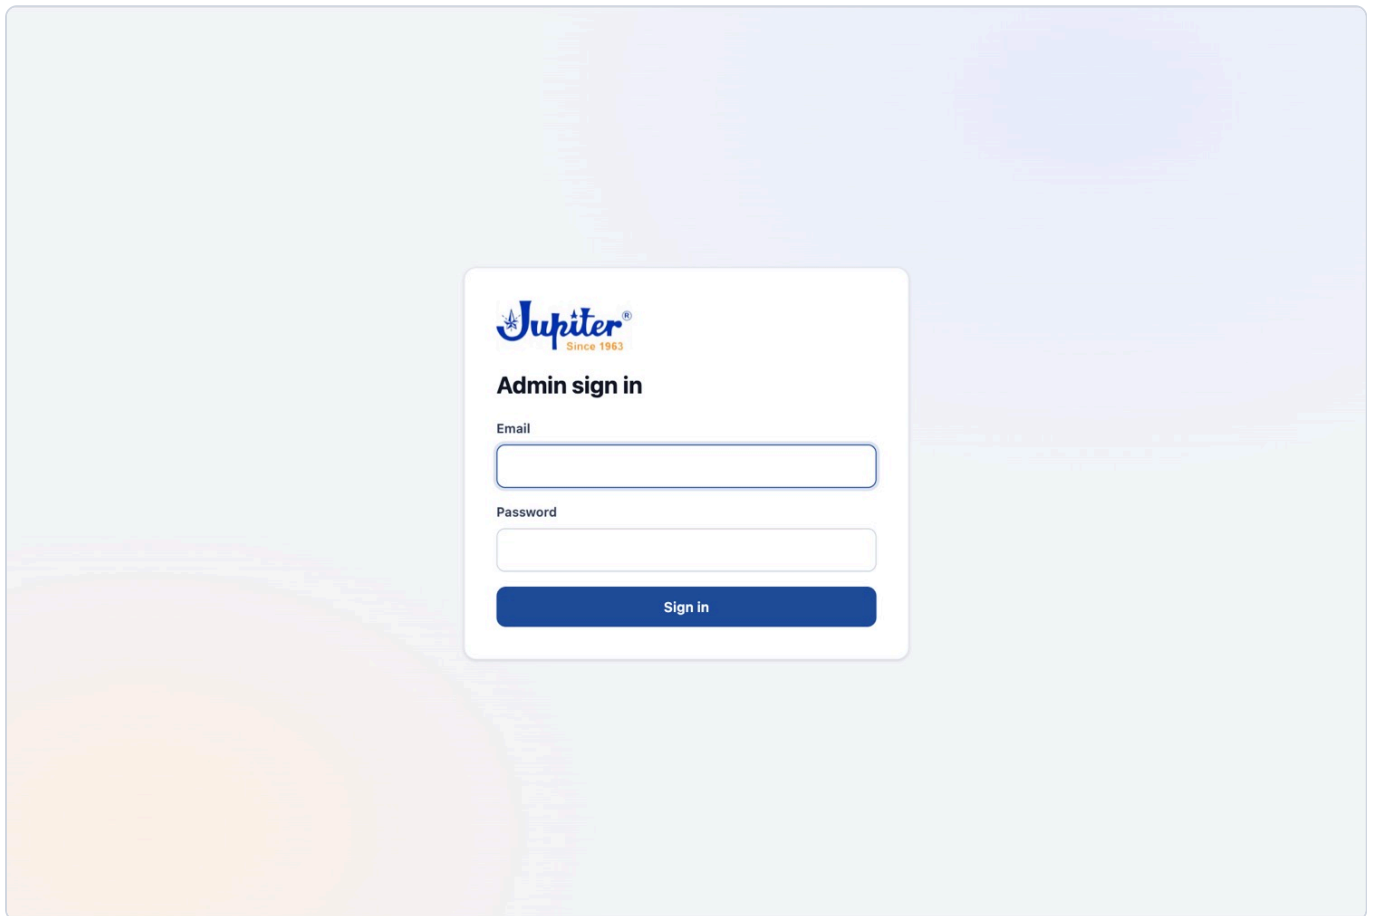

# 1. Getting started

Where the admin panel lives, how to sign in, and what you see first.

## 1.1 Opening the admin panel

The admin panel is part of the website itself. Open your website address followed by `/admin`. On the development machine this is `http://localhost:3000/admin`. On the live site it will be `https://your-domain.com/admin`.

If you are not signed in you are redirected to the sign-in page automatically.

The sign-in screen.

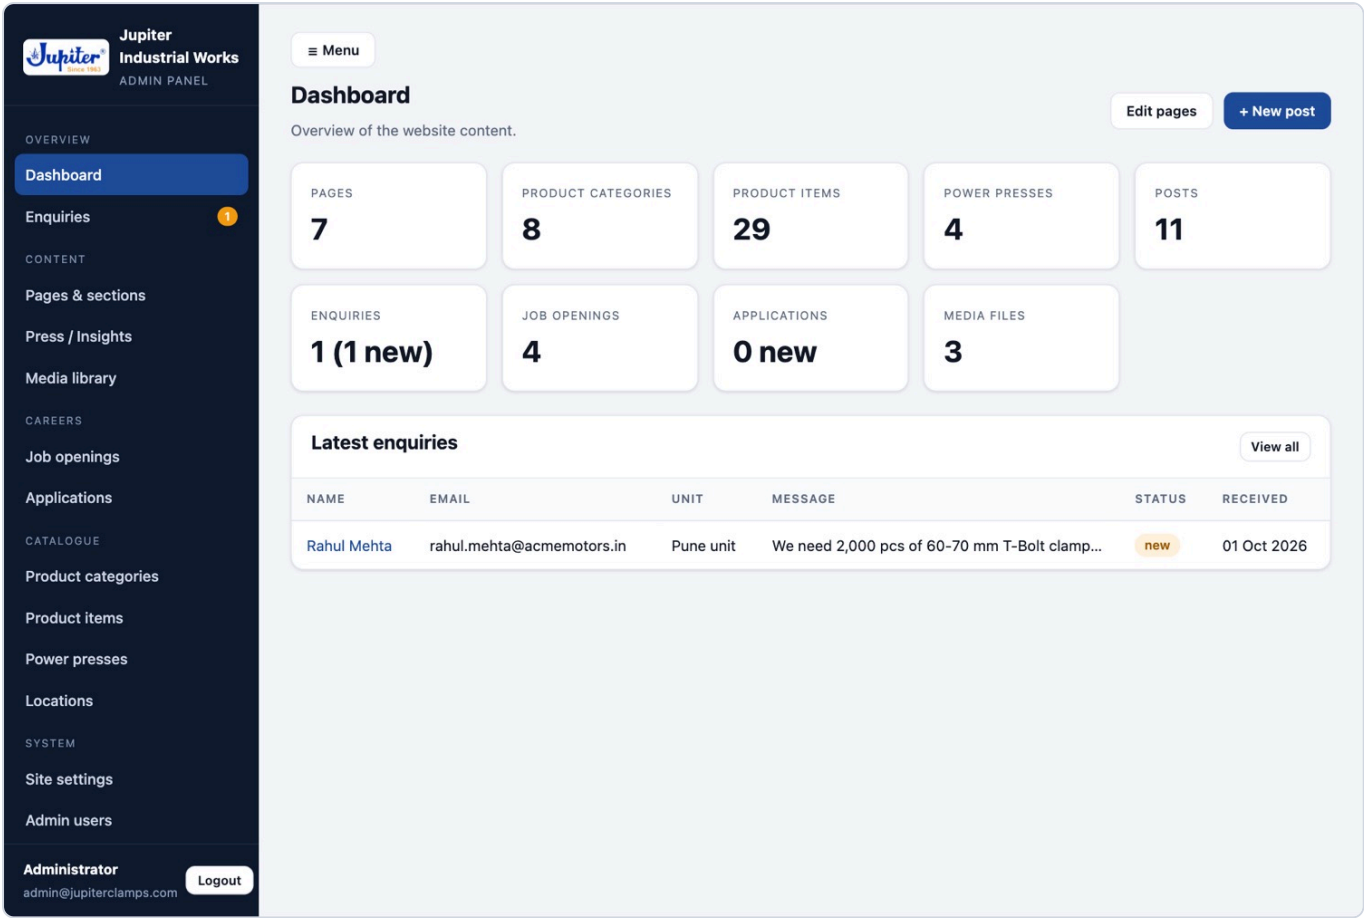

## 1.2 Signing in

1. Type your admin **e-mail** (example: `admin@jupiterclamps.com`).
2. Type your **password**.
3. Press **Sign in**. You land on the Dashboard.

The first admin account is created when the site is installed, from the `ADMIN_EMAIL` and `ADMIN_PASSWORD` values in the server's `.env.local` file. Change that password after the first sign-in (see chapter 15).

After 10 wrong attempts from the same computer the sign-in is blocked for 15 minutes. A session stays valid for 7 days; use **Logout** (bottom of the sidebar) to end it earlier.

### 1.3 The layout

Sidebar on the left (all sections of the admin), work area on the right. "View site ↗" opens the public website in a new tab.

The sidebar is grouped into **Overview** (Dashboard, Enquiries), **Content** (Pages & sections, Press / Insights, Media library), **Careers** (Job openings, Applications), **Catalogue** (Product categories, Product items, Power presses, Locations) and **System** (Site settings, Admin users). On small screens the sidebar collapses behind a **Menu** button.

## 2. How the website maps to the admin panel

Every visible part of the public website is edited in exactly one place. Use this table to find it.

| WHAT YOU SEE ON THE WEBSITE                                                                                   | WHERE TO EDIT IT                                                                                                                             |
|---------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| Logo, browser-tab title, favicon, catalog download link                                                       | Site settings → Site & branding                                                                                                              |
| Top navigation links and the two drop-down menus                                                              | Generated automatically from Product categories and Power presses; labels and panel texts in Site settings → Header & navigation             |
| "Request a Quote" button in the header                                                                        | Site settings → Header & navigation                                                                                                          |
| Home page: video hero, marquee strips, divisions, vision, mission, stats, industries, "Built to Scale" slider | Pages & sections → Home → Sections                                                                                                           |
| About page: hero, expertise rows, journey timeline, certifications                                            | Pages & sections → About Us → Sections                                                                                                       |
| Products page (grid of clamp ranges)                                                                          | Product categories (one record per card); page title in Pages → Clamps Product Range                                                         |
| A clamp range page, e.g. /products/v-band-clamps (overview, features, steps, designs, materials, industries)  | Product categories → that record; the design cards are Product items                                                                         |
| Power press page /power-press (featured press in full, then the range) and each press's own page              | Power presses (one record per machine); the featured press is chosen in Pages → Power Press Range → Sections                                 |
| Insights list and article pages (/press)                                                                      | Press / Insights                                                                                                                             |
| Contact page: three plant cards with maps                                                                     | Locations                                                                                                                                    |
| Contact page: enquiry form texts and unit options                                                             | Pages & sections → Contact Us → "Enquiry form" section                                                                                       |
| Messages sent through the enquiry form                                                                        | Enquiries                                                                                                                                    |
| Careers page: list of openings, Apply forms, "Send us your CV" form                                           | Careers → Job openings (the cards); Pages → Careers → Sections (texts); applications arrive under Careers → Applications and by e-mail to HR |
| "Ready to Integrate Jupiter" banner above the footer                                                          | Site settings → Bottom CTA banner                                                                                                            |
| Footer text, link columns, address, phone, e-mail, social icons                                               | Site settings → Footer / Contact details / Social links                                                                                      |
| Pictures, videos, PDFs                                                                                        | Media library (or the Browse / upload button next to any image field)                                                                        |
| Who can sign in to the admin                                                                                  | Admin users                                                                                                                                  |

Everything you save is **live immediately** on the public website. There is no separate "publish" step, except the Published / Enabled switches that let you hide a record or a section.

## 3. Form controls explained

All admin forms are built from the same small set of controls. Learn them once.

1. HERO (VIDEO)
Precision You Can Rely On.

Headline \*
Precision You Can Rely On.

Sub-line
Innovation Born from Experience.

Sub-headline (small line under the sub-line)
Engineered for industries that demand performance without compromise.

Intro paragraph

Since 1959, Jupiter Industrial Works has been designing and manufacturing high-precision Clamps and Power Press Machines. From our pioneering plant in Shrivardhan to advanced units in Rabale and Pune, we bring six decades of engineering reliability and innovation to global OEMs.

Quick highlights (chips)
60+ years of hands-on manufacturing expertise, Certified IATF 16949:2016 quality systems, 3 manufacturing facilities – Shrivardhan | Rabale |

Save section

A typical form (the Home hero section): text fields, two media fields with a thumbnail preview, and a repeatable "Buttons" list with two items.

| CONTROL                     | HOW IT WORKS                                                                                                                                                                                                                                                                                                 |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Single-line text</b>     | Short text such as a title or a link. A red <b>*</b> after the label means it is required.                                                                                                                                                                                                                   |
| <b>Multi-line text</b>      | Longer paragraphs. Line breaks are kept. In the About hero, a <i>blank line</i> starts a new paragraph.                                                                                                                                                                                                      |
| <b>HTML editor</b>          | For article bodies and free text blocks. Write simple HTML tags ( <code>&lt;p&gt;</code> , <code>&lt;h3&gt;</code> , <code>&lt;ul&gt;&lt;li&gt;</code> , <code>&lt;a href&gt;</code> , <code>&lt;img src&gt;</code> ). Click <b>Preview</b> to see the result. Scripts are removed automatically for safety. |
| <b>Number</b>               | Whole numbers, e.g. the display <b>Order</b> (lower numbers come first).                                                                                                                                                                                                                                     |
| <b>On / Off switch</b>      | Green = on. Used for <b>Published</b> / <b>Enabled</b> (visible on the site) and option flags.                                                                                                                                                                                                               |
| <b>Dropdown</b>             | Pick one option from a fixed list (for example an icon name or a button style).                                                                                                                                                                                                                              |
| <b>Image / Video field</b>  | Shows a thumbnail, the file path, and three buttons: <b>Browse / upload</b> (opens the Media library picker), <b>Open</b> (view the file) and <b>Clear</b> . You may also type a path such as <code>/images/logo.png</code> or paste a full <code>https://...</code> address.                                |
| <b>Repeatable list</b>      | A stack of items (buttons, cards, rows...). Each item has a header with ▼ collapse, ↑ ↓ move, 📄 duplicate and ✕ remove. Use <b>+ Add ...</b> at the bottom to add an item.                                                                                                                                   |
| <b>Comma-separated list</b> | Type values separated by commas: <code>AISI 304, AISI 316 L, SAE 1010</code> . Each value becomes one chip / badge on the site.                                                                                                                                                                              |
| <b>Linked dropdown</b>      | Chooses a related record, e.g. the Category of a product item or the featured Power press.                                                                                                                                                                                                                   |
| <b>Date picker</b>          | Pick a calendar date (publish date of a post).                                                                                                                                                                                                                                                               |
| <b>Page address</b>         | Product ranges, presses and posts get their web address automatically from the name ( <code>/products/v-band-clamps</code> ). It is kept when you rename, so links never break. Only custom pages have an editable slug.                                                                                     |
| <b>Group boxes</b>          | Long forms are split into collapsible boxes (Listing card, Overview hero, SEO...). Click a box title to open or close it.                                                                                                                                                                                    |

The Media library picker, opened from any Browse / upload button: drag files in, press Upload, click a tile to choose it, or paste an external URL and press Use URL.

### 3.1 Saving

Every form has a blue **Save** button at the top right (sections have **Save section** at the bottom of the open section). A small black toast at the bottom right confirms **Saved**; a red toast shows the reason if something was refused (for example a missing required field). In the sections editor an orange **unsaved** pill reminds you that a section has changes that are not saved yet.

**Delete** buttons ask for confirmation and cannot be undone. Prefer switching **Published** / **Enabled** off if you may need the content later.

# 4. Dashboard

| NAME        | EMAIL                     | UNIT      | MESSAGE                                       | STATUS | RECEIVED    |
|-------------|---------------------------|-----------|-----------------------------------------------|--------|-------------|
| Rahul Mehta | rahul.mehta@acmemotors.in | Pune unit | We need 2,000 pcs of 60-70 mm T-Bolt clamp... | new    | 01 Oct 2026 |

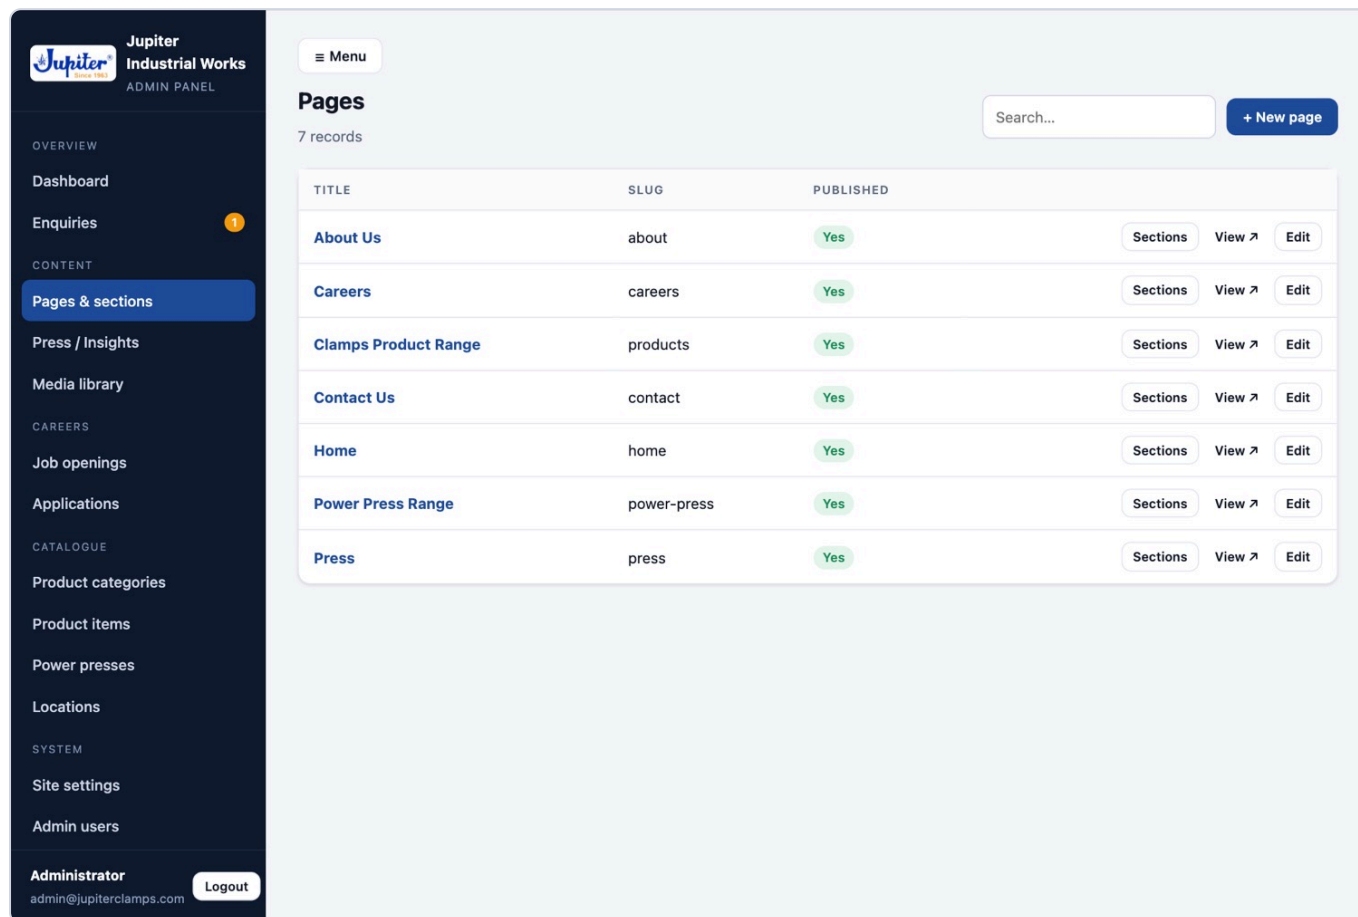

Counters are clickable shortcuts. The "Enquiries" counter shows how many are still new. The table lists the six latest enquiries.

The **Enquiries** entry in the sidebar also shows an orange badge with the number of unread enquiries.

## 5. Pages & sections

A page is a list of sections. You edit the page details (title, SEO) in one place and its sections in another.

### 5.1 Pages list

The screenshot displays the Jupiter Industrial Works Admin Panel. The left sidebar contains a navigation menu with categories: OVERVIEW (Dashboard), Enquiries (1), CONTENT (Pages & sections, Press / Insights, Media library), CAREERS (Job openings, Applications), CATALOGUE (Product categories, Product items, Power presses, Locations), and SYSTEM (Site settings, Admin users). The user is logged in as Administrator (admin@jupiterclamps.com) with a Logout button.

The main content area is titled "Pages" and shows 7 records. It includes a search bar and a "+ New page" button. The table lists the following pages:

| TITLE                | SLUG        | PUBLISHED |                      |
|----------------------|-------------|-----------|----------------------|
| About Us             | about       | Yes       | Sections View ↗ Edit |
| Careers              | careers     | Yes       | Sections View ↗ Edit |
| Clamps Product Range | products    | Yes       | Sections View ↗ Edit |
| Contact Us           | contact     | Yes       | Sections View ↗ Edit |
| Home                 | home        | Yes       | Sections View ↗ Edit |
| Power Press Range    | power-press | Yes       | Sections View ↗ Edit |
| Press                | press       | Yes       | Sections View ↗ Edit |

Six system pages are created at installation (Home, About Us, Clamps Product Range, Power Press Range, Press, Contact Us). System pages cannot be deleted. "Sections" edits the content, "View ↗" opens the page on the site.

| SEO title              | Single-line text                    |                                                      | Careers   Jupiter Industrial Works                                          |
| SEO description        | Multi-line text                     |                                                      | Join Jupiter Industrial Works – open roles at Shrivardhan, Rabale and Pune. |

The slug `home` is the front page. Custom pages are served at `/<slug>`, e.g. slug `careers` → `/careers`. The slug of a system page cannot be changed.

## 5.3 Sections editor

**Jupiter Industrial Works ADMIN PANEL**

**Pages**

**Home — sections**

Open a section to edit it. Use the arrows to reorder and the switch to show or hide it.

| Type                             | Preview                    | Enabled                             | Reorder | Remove |
|----------------------------------|----------------------------|-------------------------------------|---------|--------|
| 1. HERO (VIDEO)                  | Precision You Can Rely On. | <input checked="" type="checkbox"/> | ↑ ↓     | ×      |
| 2. MARQUEE STRIP                 |                            | <input checked="" type="checkbox"/> | ↑ ↓     | ×      |
| 3. DIVISIONS CARDS               | Two Divisions.             | <input checked="" type="checkbox"/> | ↑ ↓     | ×      |
| 4. VISION BANNER                 | VISION                     | <input checked="" type="checkbox"/> | ↑ ↓     | ×      |
| 5. MISSION (4 PILLARS)           | MISSION                    | <input checked="" type="checkbox"/> | ↑ ↓     | ×      |
| 6. MARQUEE STRIP                 |                            | <input checked="" type="checkbox"/> | ↑ ↓     | ×      |
| 7. CRAFTING / STATS / INDUSTRIES | Crafting clamping          | <input checked="" type="checkbox"/> | ↑ ↓     | ×      |
| 8. BUILT TO SCALE SLIDER         | Built to Scale             | <input checked="" type="checkbox"/> | ↑ ↓     | ×      |
| 9. HERO (VIDEO)                  |                            | <input checked="" type="checkbox"/> | ↑ ↓     | ×      |

The Home page has eight sections. Each row shows its type, a short preview, an Enabled switch, ↑ ↓ reorder arrows and × remove.

1. Click the ► arrow of a section to open its fields.
2. Edit the fields.
3. Press **Save section**. Each section is saved separately.
4. Use the **switch** to hide a section without deleting it; use ↑ ↓ to change the order on the page (saved instantly).
5. To add a section choose a type in the box at the bottom and press **+ Add section**; it appears last and opens for editing. Fill it in and save it — an empty section is simply not shown on the site.

Hero (video)

Full-width video hero with headline, sub-line and buttons.

+ Add section

The add-section box. The grey text explains the selected type.

## 5.4 Creating a brand-new page (example: Careers)

1. Go to **Pages & sections** → **+ New page**. Title `Careers`, leave the slug blank (it becomes `careers`), Published on, Show bottom CTA banner on. Save.
2. Press **Edit sections**. Add a **Page title** section: Title `Careers at Jupiter`, Ghost text `Careers`. Save section.
3. Add a **Rich text** section with the job description HTML (see the example in chapter 6). Save section.

4. Open `/careers` on the site to check. To put it in the top navigation, add an Extra link in Site settings → Header & navigation with Label `Careers` and Link `/careers`.

## 6. Section types reference

All 23 section types, every field, with example values taken from the live site.

### 6.1 Hero (video) `hero_video`

Full-width video hero with headline, sub-line and buttons. *Used on: Home.*

| FIELD                                               | CONTROL                                       | NOTES           | EXAMPLE VALUE                                                                                                                                                                                                                                                     |

| <b>HTML content</b>         | HTML editor (with Preview) |       | <pre>&lt;p&gt;We are hiring &lt;b&gt;design engineers&lt;/b&gt; and CNC operators for our Pune unit.&lt;/p&gt;&lt;h3&gt;How to apply&lt;/h3&gt;&lt;ul&gt;&lt;li&gt;Email your CV to hr@jupiterclamps.com&lt;/li&gt;&lt;li&gt;Mention the role in the subject line&lt;/li&gt;&lt;/ul&gt;</pre> |
| <b>Narrow article width</b> | On / Off switch            |       | Yes (on)                                                                                                                                                                                                                                                                                      |

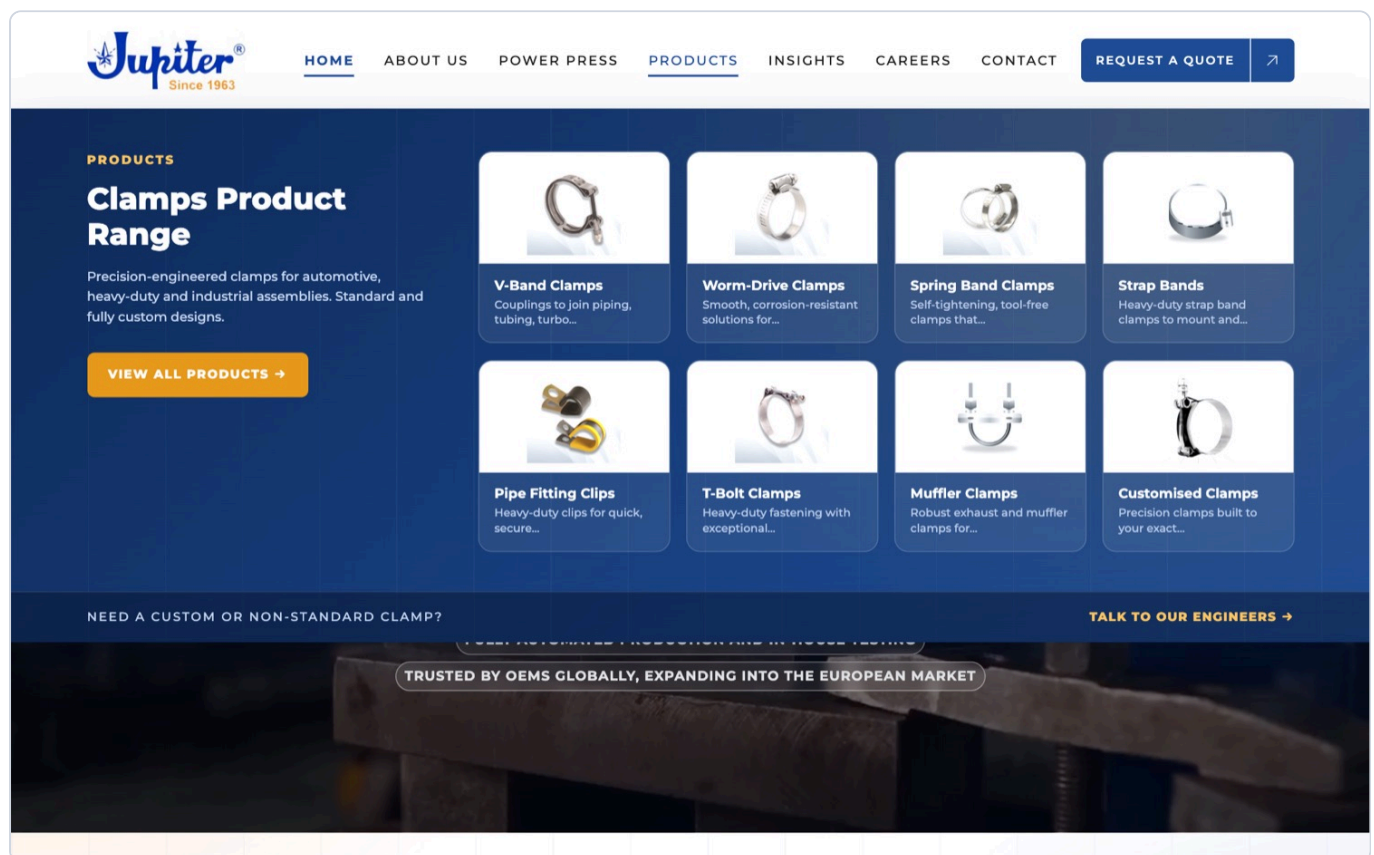

**Automatic sections** (Product categories grid, Featured power press, Power press grid, Press / news list, Contact locations) only hold the heading texts or a choice. Their content is the published records of the matching catalogue, so you never type it twice.

## 7. Navigation menu (automatic)

The top navigation builds itself. There is nothing to maintain twice.

The header always shows: **Home · About Us · Power Press ▾ · Products ▾ · Insights · Contact**, plus the "Request a Quote" button.

| PART OF THE HEADER                            | WHERE IT COMES FROM                                                                     |
|-----------------------------------------------|-----------------------------------------------------------------------------------------|
| Link labels (Home, About Us, ...)             | Site settings → Header & navigation → <b>Menu labels</b>                                |
| Tiles inside the <b>Products</b> drop-down    | Your published <b>Product categories</b> (name, card text, card image), in their Order  |
| Tiles inside the <b>Power Press</b> drop-down | Your published <b>Power presses</b> (name, card text, image), in their Order            |
| Left panel and bottom bar of each drop-down   | Site settings → Header & navigation → <b>Products drop-down / Power Press drop-down</b> |
| Extra links (e.g. Careers)                    | Site settings → Header & navigation → <b>Extra links</b> ; they appear before Contact   |
| "Request a Quote" button                      | Site settings → Header & navigation → Header button label / link                        |

Website: the Products drop-down. Left panel = "Products drop-down" settings; the seven tiles = the published product categories; bottom bar = Bottom bar text + link.

A drop-down is hidden automatically when it has no published records. To take a range out of the menu, switch its **Published** off; to add one, create a new Product category or Power press.

## 8. Product categories & product items

A **category** is one clamp range (its own page); **items** are the individual designs shown as cards inside it.

| NAME               | ORDER | PUBLISHED |                          |
|--------------------|-------|-----------|--------------------------|
| V-Band Clamps      | 0     | Yes       | Items View ↗ Edit Delete |
| Worm-Drive Clamps  | 1     | Yes       | Items View ↗ Edit Delete |
| Spring Band Clamps | 2     | Yes       | Items View ↗ Edit Delete |
| Strap Bands        | 3     | Yes       | Items View ↗ Edit Delete |
| Pipe Fitting Clips | 4     | Yes       | Items View ↗ Edit Delete |
| T-Bolt Clamps      | 5     | Yes       | Items View ↗ Edit Delete |
| Muffler Clamps     | 6     | Yes       | Items View ↗ Edit Delete |
| Customised Clamps  | 7     | Yes       | Items View ↗ Edit Delete |

One row per range. "Items" jumps to that range's product items; "View ↗" opens the public page.

### 8.1 Two page layouts

Layout "Overview hero + features + steps + designs" (V-Band Clamps): kicker, H1, H2, description, chips, buttons, hero image and badge; then the optional blocks.

Layout "Simple cards grid" (T-Bolt Clamps): just the title and the item cards with name + description; then the optional blocks.

Blocks that are left empty are simply not shown. So a range can have only a hero, or a hero plus materials, and so on. The designs grid is titled "<Name> Designs", the materials block "Material Options" and the

industries block "Industries & Application" automatically.

## 8.2 Category fields

| FIELD                     | CONTROL                                                                  | NOTES         | EXAMPLE VALUE                              |
|---------------------------|--------------------------------------------------------------------------|---------------|--------------------------------------------|
| <b>Name</b>               | Single-line text <b>required</b>                                         |               | V-Band Clamps                              |
| <b>Order</b>              | Number                                                                   | 0 comes first | 0                                          |
| <b>Published</b>          | On / Off switch                                                          |               | (empty)                                    |
| <b>Detail page layout</b> | Dropdown: Overview hero + features + steps + designs / Simple cards grid |               | Overview hero + features + steps + designs |

### LISTING CARD

Overview

H1 title

V-Band Clamps

H2 sub-title

How a V-Band Coupling Clamp Works

Description

V-band clamps provide a secure, leak-proof seal for high-pressure pipe and flange connections. Instead of relying on multiple heavy bolts, a single V-band clamp applies equal pressure all the way around the joint.

Chips

Leak-proof seal, Uniform 360° pressure, Vibration-resistant

How the Mechanical Seal Works

Steps

1. Mounting

Title

Mounting

Text

The inner V-segments sit directly over the tapered edges of two mating pipe flanges.

2. Tightening

Title

Tightening

Text

As the T-bolt nut is tightened, it pulls the outer band taut around the joint.

3. Radial Pressure

Title

Radial Pressure

Text

This tightening creates a uniform inward radial force across the entire 360° circumference.

4. Wedging Action

# POWER PRESS

## POWER PRESS

### SINGLE POWER PRESS

Our unique series of Single Power Press machines are tailored to customer-specific requirements that ensures highly credible desired end product. Duly hardened and grounded, the parts such as flywheel, crank shafts, etc ensures long-lasting durability of the machine. Properly sized flywheel is madeup of high grade C and is balanced for storing and releasing of energy as desired during pressing. Machined to close accuracy, hardened and ground, then fixed in gun metal bushes for perfect alignment, the crank shaft is made up of special alloy steel. Proper alignment of the press ensured by machining of the profile cut steel plates prior to welding, the frame which is made-up of all steel construction fabricated from steel plates with suitable cross ribbings.

Power Press

Description

Our unique series of Single Power Press machines are tailored to customer-specific requirements that ensures highly credible desired end-product. Duly hardened and grounded, the parts such as flywheel, crank shafts, etc ensures long-lasting durability of the machine. Properly sized flywheel is madeup of high grade CI and is balanced for storing and releasing of energy as desired during pressing. Machine to close accuracy, hardened and ground, then fixed in gun metal bushes for perfect alignment, the crank shaft is made up of

## Jupiter Showcases Power Press and Clamp Range at Industrial Trade Show

📅 10 Sept 2026

👤 Jupiter Industrial Works Rabale

👁 321 Views

Our Rabale team welcomed OEM buyers and channel partners at the Gogte Power Press stall, presenting the latest T-Bolt clamps and the new range of power presses.

Jupiter Industrial Works continues to invest in people, processes and technology across its Shrivardhan, Rabale and Pune units. For more information about this update, our product range or partnership opportunities, please contact our marketing team.

Job title \*

Quality Engineer – IATF 16949

Department

Quality

Location

Rabale, Navi Mumbai

Employment type

Full-time

Experience (e.g. 3 - 5 yrs)

3 - 6 yrs

Number of positions

1

Order

0

0 comes first

Qualifications (short, shown on the card)

B.E. / Diploma in Mechanical or Production Engineering. Hands-on experience with IATF 16949 systems, PPAP, APQP and reverse batch traceability in an automotive component plant.

Full description (HTML, shown when expanded)

HTML Preview

Basic HTML tags are supported (paragraphs, headings, lists, links, images).

You will own incoming, in-process and final inspection for our clamp lines, run DVP & R testing (radial strength, torque, fatigue) and drive corrective actions with production.

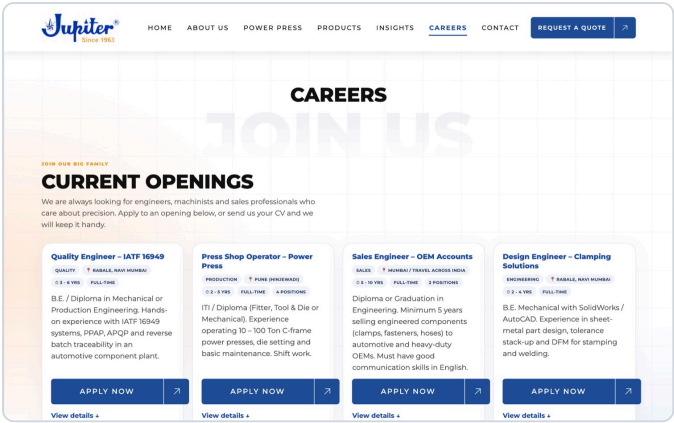

- Maintain IATF 16949 documentation and customer PPAP files
- Operate and calibrate torque, salt-spray and fatigue test rigs
- Lead 8D / CAPA with suppliers and shop floor

Published

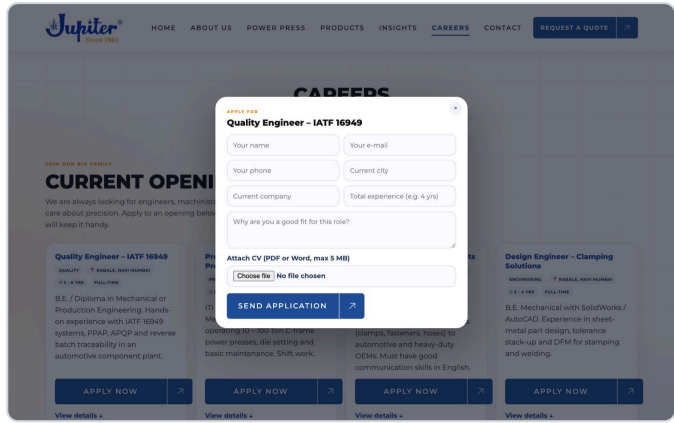

☒ Yes

Admin: an opening. Qualifications is the short text on the card; the HTML description shows when a visitor presses "View details"

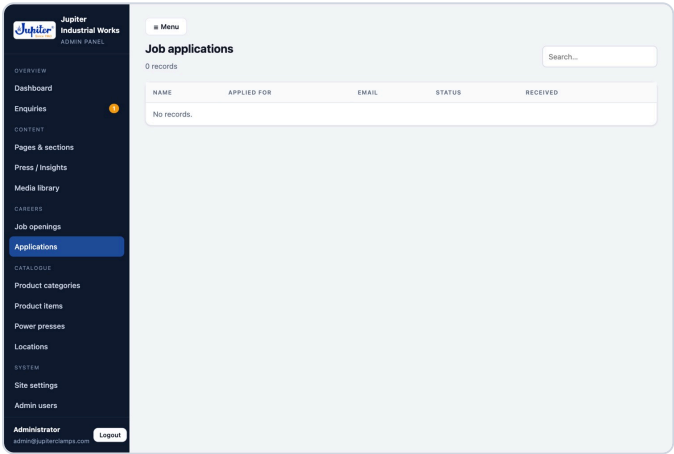

Website: the openings grid. Each card shows title, department, location, experience, type and the qualifications text.

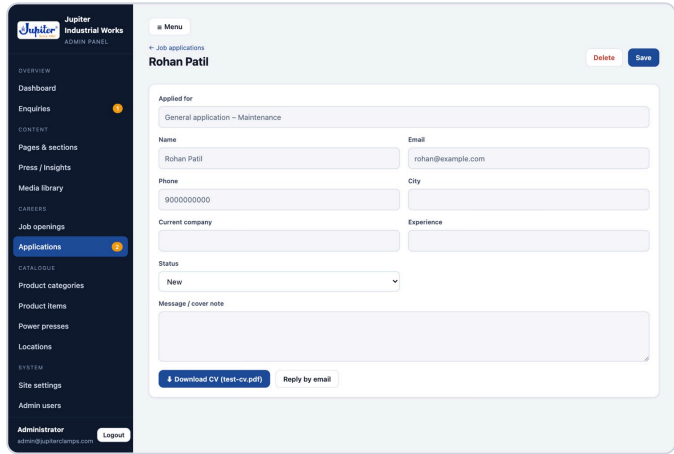

Website: pressing Apply Now opens the application form for that opening (name, e-mail, phone, city, company, experience, message, CV upload).

## Applications

Every application, newest first, with the opening it was for and a status.

The detail view: all submitted values, a Download CV button, a Status dropdown and Reply by email.

| Experience           | Single-line text read-only                                 |       | 4 yrs                                            |
| Status               | Dropdown: New / Shortlisted / Interview / Hired / Rejected |       | Shortlisted                                      |
| Message / cover note | Multi-line text read-only                                  |       | IATF lead auditor, PPAP experience with Tier-1s. |

1. A candidate applies on the website. The application is saved here, HR receives an e-mail with the CV attached, and the candidate receives an acknowledgement.
2. Open the application, press **Download CV**, and set the **Status** (Shortlisted, Interview, Hired, Rejected). Save.
3. Use **Reply by email** to contact the candidate from your own mail program.

Which address receives the applications is set in **Site settings** → **Contact details** → **Send job applications to (HR)**. Contact-form enquiries go to the address in "Send contact-form enquiries to". E-mail sending needs the SMTP settings on the server (see the deployment notes).

## Texts on the Careers page

The headings, intro, button labels, success messages and the phone / WhatsApp / e-mail shown next to the CV form are edited in **Pages & sections** → **Careers** → **Sections** (sections "Current openings" and "Send us your CV").

# 11. Locations

|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Allowed types   | JPG, PNG, WebP, GIF, SVG, AVIF images · MP4 / WebM video · PDF. Maximum 25 MB per file.                                                                                      |
| Where files go  | Uploads are stored at <code>/uploads/&lt;timestamp&gt;--&lt;name&gt;.&lt;ext&gt;</code> . That path is what you paste into an image field (or pick it with Browse / upload). |
| Built-in images | The pictures shipped with the site live under <code>/images/...</code> and the hero video under <code>/video/hero.mp4</code> ; you can type those paths directly.            |
| External images | A full address such as <code>https://jupiter-clamps.com/.../clamp.png</code> works everywhere an image is expected.                                                          |
| Catalog PDF     | Upload the PDF here, copy its URL, then paste it into Site settings → Site & branding → <b>Catalog download URL</b> . All "Download Catalog" buttons then point to it.       |
| Deleting        | Deleting a file does not update the pages that use it — those will show a broken image. Replace the field value first.                                                       |

# 14. Site settings

Branding, header and navigation, contact details, social links, footer and the bottom banner. Each tab is saved separately with the button at the top right.

## 14.1 Site & branding

| FIELD                                   | CONTROL                              | NOTES                                                                                   | EXAMPLE VALUE                                                                                                                                           |

This screenshot shows the top half of the 'Site settings' form. On the left is a dark sidebar with a menu containing 'Catalogue', 'Product categories', 'Product items', 'Power presses', 'Locations', 'SYSTEM', 'Site settings' (highlighted), 'Admin users', and 'Administrator'. The main content area has a light blue header with the Jupiter Industrial Works logo and 'ADMIN PANEL'. Below the header is a 'Menu' tab. The form is divided into sections: 'Header & navigation' (with fields for 'Menu label: Insights', 'Insights', 'Show Careers in the menu' (checked), 'Extra links (shown before Contact)', and 'Add extra links (shown before contact)'); 'Products drop-down' (with fields for 'Eyebrow', 'Products', 'Title', 'Clamps Product Range', 'Text', 'Precision-engineered clamps for automotive, heavy-duty and industrial assemblies. Standard and fully custom designs.', 'CTA label', 'View all products →', 'CTA link', '/products', 'Bottom bar text', 'Need a custom or non-standard clamp?', 'Bottom bar link label', 'Talk to our engineers →', and 'Bottom bar link', '/contact'); and 'Power Press drop-down' (with fields for 'Eyebrow', 'Power Press', 'Title', 'Power Press Range', 'Text', 'Robust C-frame power presses from 5 Ton to 100 Ton, built for accuracy and long-lasting durability.', 'CTA label', 'Explore power presses →', 'CTA link', '/power-press', 'Bottom bar text', 'Not sure which press fits your job?', 'Bottom bar link label', 'Talk to our engineers →', and 'Bottom bar link', '/contact').

The Header & navigation tab (top half)

This screenshot shows the bottom half of the 'Site settings' form. It continues from the top half, showing the 'Products drop-down' section with fields for 'Eyebrow', 'Products', 'Title', 'Clamps Product Range', 'Text', 'Precision-engineered clamps for automotive, heavy-duty and industrial assemblies. Standard and fully custom designs.', 'CTA label', 'View all products →', 'CTA link', '/products', 'Bottom bar text', 'Need a custom or non-standard clamp?', 'Bottom bar link label', 'Talk to our engineers →', and 'Bottom bar link', '/contact'. Below this is the 'Power Press drop-down' section with fields for 'Eyebrow', 'Power Press', 'Title', 'Power Press Range', 'Text', 'Robust C-frame power presses from 5 Ton to 100 Ton, built for accuracy and long-lasting durability.', 'CTA label', 'Explore power presses →', 'CTA link', '/power-press', 'Bottom bar text', 'Not sure which press fits your job?', 'Bottom bar link label', 'Talk to our engineers →', and 'Bottom bar link', '/contact'. At the bottom right is a 'Save Header & navigation' button.

(bottom half)

The Bottom CTA banner tab

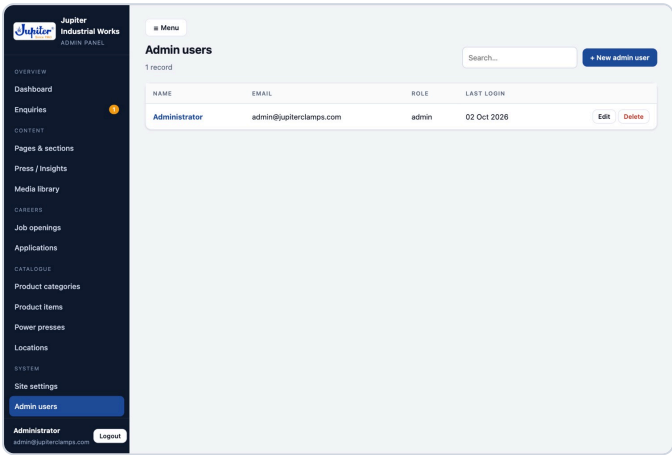

Website: the Bottom CTA banner — Heading (| = line break), italic line, two buttons and the big ghost word.

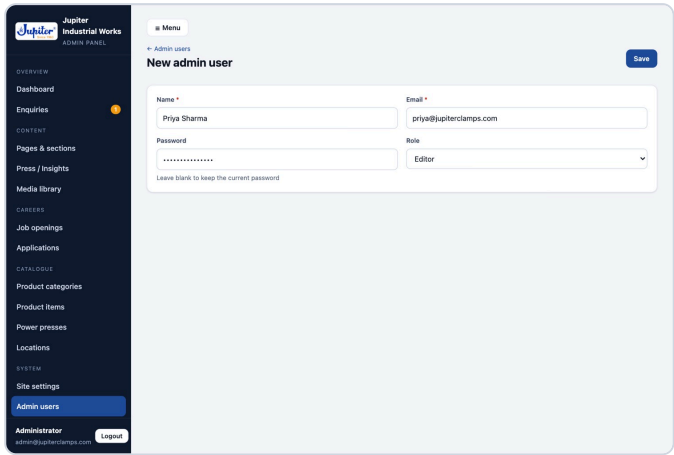

Website: footer — logo, About text, social icons, Links column, Products column, Contact details and the copyright line ({year} becomes the current year).

# 15. Admin users

Who can sign in to the admin panel.

The users list (password hashes are never shown).

Example of a new Editor account.

| FIELD    | CONTROL                          | NOTES                                    | EXAMPLE VALUE           |
|----------|----------------------------------|------------------------------------------|-------------------------|
| Name     | Single-line text <b>required</b> |                                          | Priya Sharma            |
| Email    | Single-line text <b>required</b> |                                          | priya@jupiterclamps.com |
| Password | Password                         | Leave blank to keep the current password | StrongPass#2026         |
| Role     | Dropdown: Administrator / Editor |                                          | Editor                  |

| ROLE          | CAN DO                                                                                  |
|---------------|-----------------------------------------------------------------------------------------|
| Administrator | Everything, including creating / deleting other users.                                  |
| Editor        | Everything except managing other users (an editor can still change their own password). |

- 1. Change your password:** open Admin users → your name, type a new Password, Save. Leave the field blank to keep the current one.
- 2. Add a colleague:** + New admin user, fill Name, Email, Password, Role, Save. Tell them the password privately; they can change it after signing in.

You cannot delete your own account, and the last Administrator cannot be deleted.

# 16. Tips, rules & troubleshooting

| SITUATION                                            | WHAT TO DO                                                                                                                                                      |
|------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| I saved but the website still shows the old text     | Reload the page in the browser (Cmd/Ctrl + Shift + R). Changes are live immediately; the browser may show a cached copy.                                        |
| "A record with the same unique value already exists" | Another record already uses that name/address or e-mail. Change the name slightly (addresses are generated from it) or the e-mail.                              |
| A product range is missing from the drop-down menu   | The menu lists published Product categories / Power presses only — check that record's Published switch.                                                        |
| Something disappeared from the site                  | Check the <b>Published</b> / <b>Enabled</b> switch of the record or section, and for sections the page it belongs to.                                           |
| A section shows no content                           | Automatic sections show published catalogue records — make sure those records are published. A hero section with nothing filled in is hidden until you fill it. |
| Image not showing                                    | Open the field's <b>Open</b> link. The path must start with <code>/</code> (site file) or <code>https://</code> (external). Re-pick it with Browse / upload.    |
| Line breaks inside a short field                     | Badge texts and the CTA heading accept <code> </code> as a line break: <code>Ready to Integrate Jupiter</code> .                                                |
| Lists of words                                       | Chips, materials, marquee words, bullet points and unit options are typed as one line separated by commas.                                                      |
| Ordering                                             | Lists on the site follow the <b>Order</b> number (0, 1, 2...); sections and list items use the <code>↑ ↓</code> arrows.                                         |
| Copyright year                                       | Keep <code>{year}</code> in the Footer copyright line; it is replaced automatically.                                                                            |
| HTML looks wrong                                     | Use the <b>Preview</b> button. Close every tag you open ( <code>&lt;p&gt;...&lt;/p&gt;</code> ). Scripts are removed on purpose.                                |
| Deleted a system page?                               | Not possible — Home, About, Products, Power Press, Press and Contact are protected. Disable their sections instead.                                             |
| Forgot the admin password                            | Another administrator can set a new one in Admin users. If nobody can sign in, the site developer can reset it from the server.                                 |
